EXPERIENCE

BR Softech Pvt. Ltd.

Jaipur, India

HTML5 Developer Trainee

Feb 2026 – May 2026

- Engineered gameplay systems in Phaser 3 and JavaScript, including physics, collision detection, state machines, scoring, and multi-level progression, across multiple production HTML5 game titles.
- Architected a 20-level colour-sorting puzzle game (Tokyo Can Sort) with two gameplay modes; set up automated deployment via GitHub Actions to GitHub Pages.
- Applied studio-grade code quality standards: modular architecture, Git version control, structured handoff for production-ready builds, code review, and milestone sign-off; completed the full 10-week development program.

Bihar Skill Development Mission – Orbiqe Technologies

Noida, India

AI DevOps Engineer Trainee – NSQF Level 5

Sep 2025 – Feb 2026

- Completed NSDC-certified AI-DevOps Engineer program (SSC/Q8112, NSQF Level 5) under Ministry of Skill Development, Govt. of India; built end-to-end CI/CD pipelines with Jenkins, Ansible, Docker, Terraform, and AWS.
- Delivered HMRS (HR Management System) as on-the-job training project, integrating full DevOps lifecycle: source control, containerisation, pipeline automation, and deployment.

InAmigos Foundation

Remote

Graphic Design Intern

Jun 2025 – Jul 2025

- Produced 10+ social media posts and campaign visuals across 2 active campaigns, maintaining consistent brand identity; recognised by the CEO for output quality and delivering ahead of schedule.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), Python, SQL, C

Frontend & Game Dev: Phaser 3, React, HTML5 Canvas, CSS3, Webpack, DOM APIs, Responsive Design

DevOps & Cloud: Docker, Terraform (IaC), Jenkins, Ansible, AWS (EC2/S3), GitHub Actions, Linux, CI/CD

Backend & APIs: REST API Design, FastAPI, Node.js, Git, Version Control Workflows

AI & ML: Supervised Learning, Classification Models, Generative AI, Mem0, Qdrant, Vector Databases, Ollama (local LLM), Jupyter

AI-Augmented Dev: Prompt Engineering, LLM Tooling, Agentic Workflows, Rapid Prototyping

Testing & QA: Postman, Selenium, JMeter, Unit Testing

Design & Visual: Adobe Creative Suite, Canva, UI/UX Principles, Visual Communication

Tools: VS Code, GitLab, Notion, Webpack, Postman

PROJECTS

Recall AI – Long-Term Memory for AI Agents | Python, Mem0, Qdrant, Vector Search

2026

- Built a long-term memory layer for AI agents using Mem0 as the memory framework and Qdrant as the self-hosted vector store for persistent, retrievable context across sessions.
- Implemented a retrieve-reason-store loop so agents recall user preferences and prior interactions beyond a single conversation window, with low-latency retrieval.

Tokyo Can Sort | Phaser 3, JavaScript, Webpack, GitHub Actions

2026

- Designed and built a 20-level colour-sorting puzzle game with two modes (unlimited and move-limited); entire game loop, level state machine, and win/fail logic written from scratch.
- Tap-first input layer ensures full mobile and desktop compatibility; CI/CD via GitHub Actions auto-deploys every merge to GitHub Pages.

Disaster Recovery Advisor | React, Python, FastAPI, ML, Ollama, Material-UI

Nov 2024 – Feb 2025

- Full-stack AI system predicting natural disaster risk (95% test accuracy) with a React dashboard, Python/FastAPI backend, and a local LLM (Ollama) generating situation-specific safety guides for NGO relief teams.

EDUCATION

Haldia Institute of Technology

Haldia, India

Master of Computer Applications (MCA) – CGPA: 8.11 / 10

2023 – 2025

Birla Institute of Technology, Mesra

Ranchi, India

Bachelor of Computer Applications (BCA) – CGPA: 8.63 / 10

2020 – 2023

CERTIFICATIONS

AI-DevOps Engineer, NSQF L5, NSDC/Skill India (Feb 2026) • Generative AI Mastermind, Outskill • DevOps on AWS, AWS (Nov 2025) • Data Analytics Job Simulation, Deloitte/Forage (Jul 2025) • AI Tools & ChatGPT Workshop, be10x (Jul 2025) • Build Your Own Generative AI Model, IIT Delhi Alumnus (Mar 2024)
